

# National Parks Partnerships

Here is an update on news and events from  
National Parks Partnerships

---

## Partner Update

### New Partnerships

NPP have been successful in their grant funding bid with **AMEX**. A joint bid application with the South Downs NPA has initially been approved for one year with grants supporting tree planting and educational visits, with half of the funding going to the South Downs. Funding for subsequent years is promising if the first year is successful.

Recent licensing agreements have been agreed with **Pawprint** who will be designing a range of embroidered stitch-on badges for each park. They have agreed to a 3-year term with a 10% royalty rate to the Foundation. **Mapelio** have agreed to donate 10% of their beautiful, sustainably produced National Parks map print sales to the Foundation.

## Partnerships in Action

### BMW UK

In addition to adding electric-vehicle charging infrastructure throughout the 15 National Parks, BMW UK will also work with National Parks UK to support locally delivered initiatives, focussed on enabling more sustainable tourism, nature restoration, biodiversity and wellbeing through The Recharge in Nature Fund.

These projects, one in each National Park, will enable the Parks to promote more sustainable UK tourism, enhance wellbeing and to restore nature and biodiversity, helping the National Parks to progress faster and with greater impact in these priority areas. Watch the video below to learn more about what the partnership means to BMW, the National Parks and the communities that live and work there.

## Forest Holidays

Forest Holidays continued support of the *National Parks Futures* fund with New Forest, Peak District & Northumberland NPAs benefitting this year. The funding has enabled a range of sessions in Northumberland NPA, connecting hundreds of young people with nature. Little Larks Forest School were able to test the concept of Wild Wednesdays over the summer. They are aiming to connect 20,000 young people with nature in the next five years, inspiring the next generation to care for and protect our precious green spaces and improving their well-being through time spent in nature.

## Revere Woodland Creation Webinar

Revere is looking for funding partners to support the design and delivery of more locally owned woodland carbon projects within the UK National Parks. NPP's Naomi Conway took part in a webinar to help SBTI-aligned businesses understand the opportunity to secure a large amount of UK generated verified credits which benefit nature and communities.

The image shows a screenshot of a webinar interface. The main content area features a landscape with white cliffs and a green field, with a large play button icon overlaid. Text on the slide reads "Woodland design and carbon offtake opportunity" and "Winter 2022". Logos for "REVERE INVESTING IN NATURAL CAPITAL", "Pollodium MAKE IT PROGRESS", and "National Parks" are visible. On the right side, there is a vertical column of six small video thumbnails showing participants. At the bottom, there is a dark grey bar with the text "Watch the recent Woodland Creation Webinar hosted by Revere." and a Facebook icon.

## A year in National Parks Partnerships

NPP has taken time to reflect on the contribution of UK-level partners in the past twelve months in a website blog published today.

Find out more about National Parks partners and the impact that has been

achieved in 2022. A selection of seasonal offers on products from partners can also be found towards the end of the article linked below.

## Finally...

As always, please let [Naomi](#) or [Lisa](#) know if your Park is engaging with companies so that we can be aware, and feel free to be in touch with any corporate contacts you think could help us nationally, or if you'd like any support with your own local corporate initiatives.
