Dear Mr Goodyear

Longstone Edge – Review of Old Mineral Permissions

I refer to my letter of 2 June 2009 in which I gave your company a deadline of 30 September for the provision of information relating to the Longstone Edge ROMP.

Bleaklow Industries Ltd have requested an extension of time for provision of the information to 31 December and we have agreed to this. In the circumstances we consider it would also be appropriate to grant a similar extension to your company and we therefore agree to give Glebe Mines Ltd an extension of time to 31 December 2009 for the provision of the information requested in our letter dated 12 August 2008.

I understand that you are meeting officers to discuss what information will be required, and clearly the details will be discussed. However we thought it might be useful to set out at this stage that in order to properly inform the ROMP process we would expect to receive information to verify the extent and structure of the mineralised veins and the quantity of vein mineral. This would include borehole and trench data obtained from geological investigations in the field supported by geological memoirs and mineral output returns.

Yours sincerely

Bev Primhak
Head of Law
